

Evaluation text of the activities in Greece

During the mobility at the 7th Primary School of Xanthi in Greece from the 9th-15th October, a lot of actions took place concerning the guidance of students with learning difficulties which our school follows for their easier incorporation to our educational system.

These actions involve art, music and drama. During these activities, the students responded with great enthusiasm, they coordinated in mixed, different teams, they exchanged ideas, and they learned about the techniques our school implements through arts. A lot of friendships were created and they said they would share their experience with their classmates.

During the visit, the families were better informed about the programme and its aims. They expressed the desire to take part in such programs more often because they help their children socialize.

The teachers showed a great interest and they made a lot of questions concerning the ways of facing the problems of students with learning difficulties so as to avoid quitting. They expressed their satisfaction for the techniques used and they said they would transfer them in their educational system.
