

The mobility in Italy took place from 12th to 18th March 2023. Students and teachers from the Spanish, Greek and Romanian partner schools participated.

The organization of mobility required commitment and encountered some difficulties. Marina di Carrara is a city that bases its economy essentially on summer tourism and most of the accommodation facilities are therefore closed. However, thanks to the involvement of the community and of the stakeholders, it was possible to find suitable solutions.

The activities foreseen for the project took place on a regular basis.

The planned educational activities involved the different levels of education (nursery, primary and middle school) with the participation of a high number of classes.

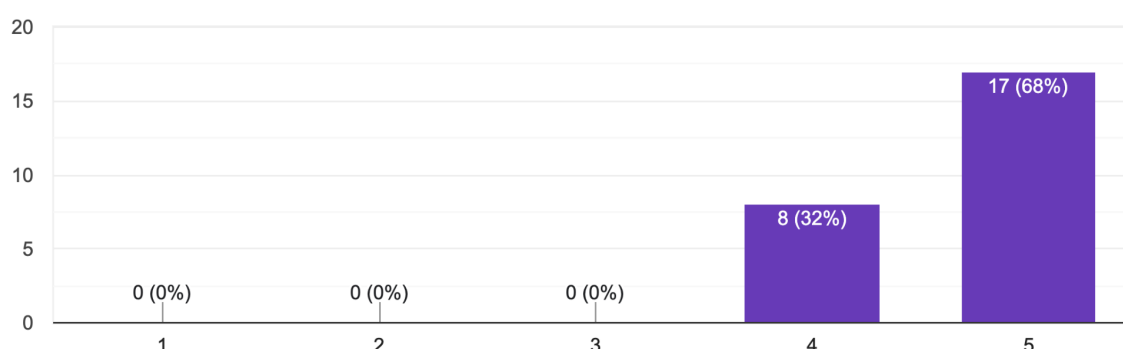

The trips made it possible to get to know the city and the surrounding area, meet the local authorities and experience the traditions of the city of Carrara.

This mobility really contributed to the improvement of school organization, with the intention of thus starting an essential process for improving the quality level of teaching and service, with a didactic and educational repercussion on users and, consequently, on the territory.

STUDENTS SURVEY

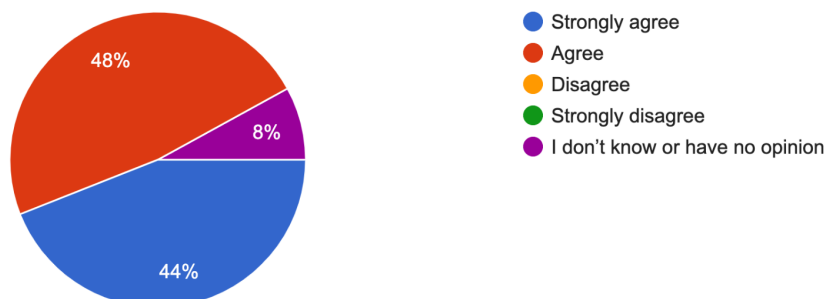

According to you how significant was your participation in the mobility for your education?

25 risposte

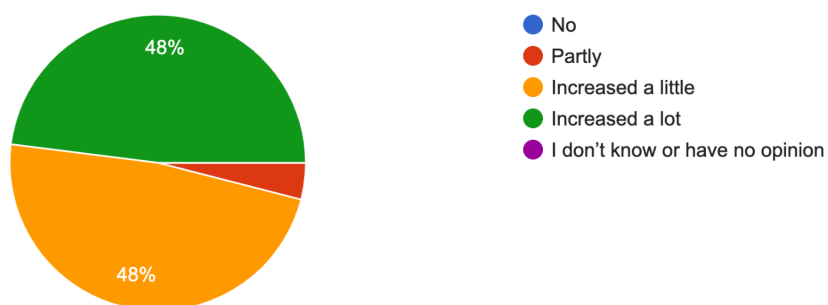

Did the student short exchange mobility activity meet your expectations?

25 risposte

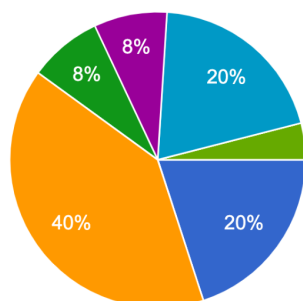

Has your proficiency in the foreign language improved as a result of it?

25 risposte

What was your favorite Workshop?

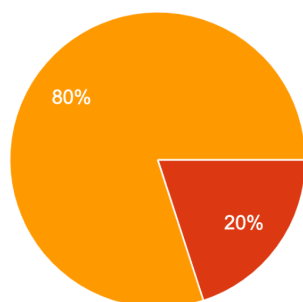

25 risposte

- QR CODE Treasure Hunt (13th March)
